About Us

Pacific Precision Builders, Inc. (PPBI) is a licensed and insured general-contracting company in Honolulu, Hawaii. We are a design + build + improve enterprise specializing in residential new construction, remodels, additions, and commercial spaces.

Jon Mosher, the owner, is a contractor with 25+ years' experience. We've done countless projects on Oahu, and we work with our dedicated team to achieve client's objectives.

In addition to a client-centric business model, we navigate designers and architects, understanding their aesthetic, functionality, budgetary, and scheduling desire, whilst managing and directing contributors to meet those needs.

Through architectural and interior design, our purpose is to capture and interpret the client's vision, offering unparalleled design solutions to meet their unique needs with thoughtfulness, creativity, and dedication.

We work to improve the quality of peoples' lives through our projects and philanthropy. We take pride in our commitment to work with integrity, and to improve, support, nurture, and serve each other, the community, our loyal customers, partners, and employees. We attribute our continued growth and success all these years to our passion for all aspects of innovation, sustainability, and humanity.

Project Spotlight: Kaohinani Project

This project was a Design + Build for our client on Dowsett near Old Pali Highway in the Nuuanu Valley. It is a custom home build, that reflects our craftsmanship and attention to detail. It features a Modern Zen esque design. These photos showcase multiple rooms in the home including; The living room, dining room, 2 bathrooms, stairway, and ariel view. It features many types of woods such as Wenge, Ash and many more. This is one our favorite jobs to have completed, we built a great relationship with our client, and was able to make their vision become a reality.
